California Conservation Corps (CCC) Deploys Members to Louisiana for Cleanup Operations

The CCC has deployed 81 corps members and staff from six California Conservation Corps centers to assist with clean up and recovery efforts from the flooding that occurred in early August in and around Baton Rouge, Louisiana.

- The crews are from CCC locations in San Bernardino, Lake Tahoe, Los Angeles, Pomona, San Diego and San Luis Obispo.
- The caravan of 13 CCC vehicles departed San Bernardino on 10/14, and will be traveling over the next three days to Baton Rouge.
- Once there, the CCC crews will join other Conservation Corps programs from across the US with mucking and gutting homes and other clean up and recovery efforts.
- The CCC will stay and work in Louisiana until November 14th, when they will begin to caravan back to California.
- All deploying corps members are AmeriCorps members. The program they are deploying for is the Corporation for National and Community Service, which is an AmeriCorps Program.

Hurricane Matthew Recovery Efforts, United States East Coast

FEMA US&R

- The Urban Search and Rescue (US&R) Blue Incident Support Team (IST) has been activated in support of Hurricane Matthew.
- 19 California Task Force (TF) members were deployed: (1) TF 1; (1) TF 2; (3) TF3; (5) TF5; (1) TF 6; (2) TF7; and (6) TF8.
- Cal OES Mission Tasking Number 2016-FIRE-27170.

WEATHER OF CONCERN

Weather of Concern

- Flash Flood Watch in effect from 1100 hours today through late this evening for areas in Siskiyou County.
- Multiple High Wind Warnings in effect throughout the North State and Northeastern Sierras due to the incoming storm front
- A High Wind Warning is in effect from 1400 hours today until 10/17/16 at 1100 hours for portions of Inyo County.
- Stormy weather will impact portions of Northern California and Southern California through Monday. Two primary waves are expected and will be water and wind related. Periods of heavy precipitation may lead to widespread urban and localized flooding making travel more dangerous.
- The Sacramento Weather area of responsibility, which includes burn scar areas in Lake, Yolo, Butte, El Dorado, Calaveras and Amador counties, advises that the upcoming weather event is not anticipated to produce precipitation rates, over the burn scar areas, which will exceed the debris flow criteria that has been established by the National Weather Service.

Active Weather Warnings, Watches and Advisories by County:

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

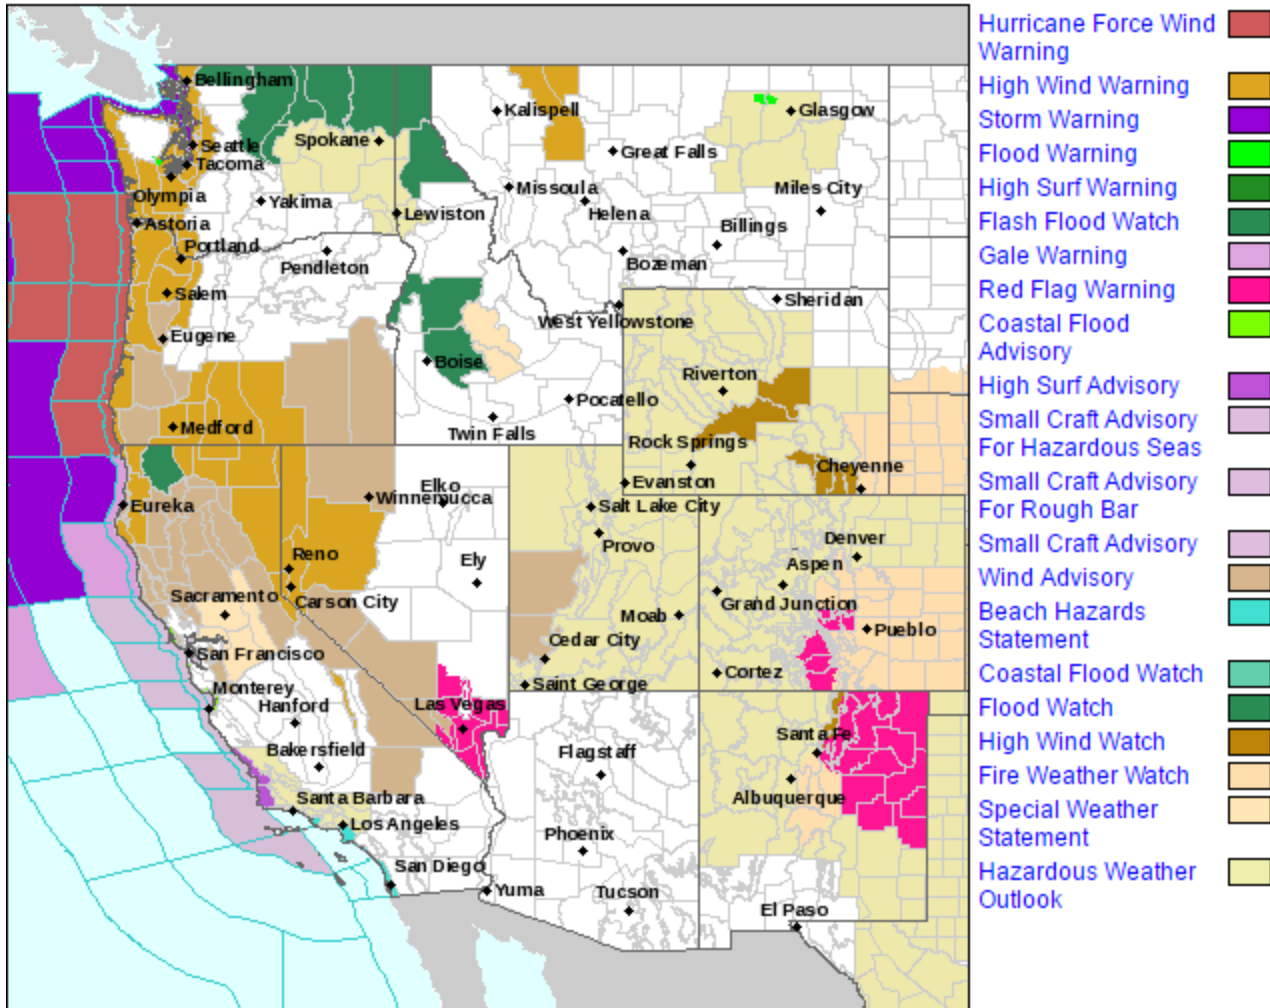

Periods of Heavy Precipitation and Strong Gusty Winds Through Early Monday

Another wave of strong SE-SW winds and heavy precipitation will move through Northern California from northwest to southeast today, and a third on Sunday. Peak gusts will reach 40-50 mph in many areas with the wave today and wind-prone areas like Weed could possibly see 60 mph or higher. The wave on Sunday will be slightly weaker. Snow levels will remain 6000-7000 feet through early Sunday, then come down to 5000-6000 feet with the wave on Sunday. The final wave will be over with by midday Monday, and only a few light mountain showers will continue. Things begin to dry out Tuesday and high pressure will become rather strong the rest of next week with a marked warming and drying trend expected. Unseasonably cool temperatures will last into next week with our warmest areas dropping into the lower and mid 60s this weekend before that warming returns next week.

SOUTHERN CALIFORNIA

A couple of Pacific storms will move into Northern California through Monday afternoon bringing scattered showers at times to much of Central California. Most locations over Central California will receive between a quarter inch and a half inch of rainfall with these storms. However, the Central Sierra and its surrounding foothills will receive up to 2 inches of rainfall. There will be little or no rainfall across Southern California. Those locations that receive rainfall across Southern California will be due to drizzle from a deep marine layer. Southwest to west winds of 20 to 40 mph with gusts to 60 mph will surface across the mountain ridges and desert passes through Monday afternoon. Temperatures will become a little below normal today through Monday. A strong ridge of high pressure will build into California from the Pacific Ocean bringing a significant warming and drying trend Tuesday through the end of next week. There will be strong north winds across the South Coast of Santa Barbara and the I-5 Corridor Monday night through Tuesday morning and then there be strong northeast to east winds across the mountains and below the canyons and passes of Southern California Tuesday night through Friday morning.

WEATHER MAP
